I like the smooth texture of the vocals. The disco/80s inspired vibe of the tracks musical production, stands out to the listener. Vocals blend really well with the production elements within the track.

Synthpop con un toque bastante ochentero de influencia New Romantic. Buena voz con un interesante registro de agudos y graves. Buena canción.

Hey there, thanks for submitting your track. We personally really like the track, we can totally feel that 80s synth pop vibe. Great production and the vocals fit perfectly to the instrumental. Unfortunately our playlist is focused a bit more on a modern pop-electronic sound, so we have to pass on this one for this specific playlist. But we personally really like your sound and also love synthwave and 80s music, so keep up the good work! Cheers Chris

great song! Sorry that i can not add it though, I do not have fitting playlists for this genre.

I like the rhythm

Has an 90s drum box feel to it which doesn't work for me but vocals on point and makes it worth listening to. Good luck with it!

80's vibe right off the bat and I love it. Vocal comes in and keeps that consistent 80's sound. Melodies on the chorus are fantastic. Really makes it pop. The post-chorus synth is very well done. Overall, really like this one. It's tough to maintain an authentic 80's sound throughout a track, but they got it with this one.

Sounds too 80 for me. Sryy!

I like the melody and the instrumental. The lyrics are interesting.

**Kami**

Not crazy about the melody not enough dynamic range for my tastes.

**Honey**

really classic vibe to it, and nice music! unfortunately it does not fit into my 90s playlist.

Great old school vibe! However we are featuring music like this at the moment, so unfortunately we'll have to skip this one for now. Keep sending us more music though :)

A beautiful ode to the passing of time. Collected style perfectly complimenting the freeze-frame storytelling.

I can't stand the 80's sound haha, but i'm sure people will go for it

### **Zeni**

The instrumental is really cool, bu the vocals need a little more work in my opinion.

Nice Like 80's song ?

I love the 80's beat, I feel like that's really in right now. I wasn't a huge fan of the vocals of the song, or the lyrics. The words "glory days" just do not sound right, sung over and over again. I did not like how the vocals were in monotone the whole time.

**Neo**

Rating: ★★

Not a bad record but unfortunately we don't have a playlist to match this record. Thanks for the submission! Love the 80's vibe though.

**Dan**

Rating: ★★

Good tunes but the vocals never really take off.

Thanks for the submission. Liking the retro synth vibes going on with the track. I could see it working well on the 'Stranger Things' soundtrack or something similar. However if I'm totally honest I feel the vocals let's the track down a bit and don't feel it's a fit for my playlists featured here.

Not feeling this type of song or lyrics.

I think the song is really plain. I know Glory Days is trying to relive the 80s, but this song isn't touching it for me.

Fun 80s sound. I don't have a playlist for this

**Slavek**

The song doesn't fit the style of the playlist.

**Ebtheceleb**

so bland... with the track being so playful it could've been so much fun but its lowkey depressing

In my opinion I think this kind of synths is a bit outdated. The vocals is pretty good though, but need more work.
